

ARTHRITIS / ENERGY

My freelance photography business had all but collapsed due to onrushing arthritis in all my joints. My worsening situation had also induced depression, as by August 1999 I was unable to earn a living.

Having been introduced to Neways products by David James, I received MAXIMOL and REVENOL through the post on 21 August and, following the advised dose on the accompanying leaflets, started taking the supplements straight away.

After one week, my energy levels had increased and the pain abated considerably. After two weeks, I moved into a new studio, shifting some of the crates myself. Although most of the stiffness in my joints had gone after one month, there was still pain in the centre of my joints, until David brought me some ANATOMIX. After taking the tablets for just one week, the pain has completely gone and my energy levels are astounding. I have just driven a party of Baha'is over 400 km each way to attend a conference. We returned late with all the youngsters exhausted and sleeping in the car, while I, at 58, was wide awake and bristling with energy, even though I drove the party there and back.

Thank you Neways, and thank you David, for bringing a quality of life back.

OSTEO-ARTHRITIS

On starting out as a Neways distributor I first of all looked to see whom within my own family I might be able to help by use of the nutritional supplements. My mother, who had just turned 80, was almost housebound with osteo-arthritis. The symptoms were pains all over, particularly in the back and legs, with swollen ankles making walking difficult. She also wore a collar to try to alleviate the pain in her shoulders and neck. Besides being in constant pain, her eyesight was failing badly, and she had frequent severe bouts of migraine.

After reading the Neways literature and talking with other distributors, I felt she had nothing to lose by trying one or two supplements. She agreed to try ANATOMIX (3 tablets per day). The swelling in her ankles responded within a few days, and the pain in her back and legs eased considerably, allowing her to walk more freely. However the neck pain persisted and she still had to wear a collar. At this point I gave her a small sample of SUBVENE cream to rub on her neck morning and evening. This did the trick – the pain eased, and the collar came off!

Last week after 6 months on her programme she visited the optician for a check on her eyesight and came away with weaker prescription glasses! Her comment: "I've been saying for some time that I could see a lot better, but nobody would believe me."

I cannot claim that my mother is completely pain-free, but her quality of life has improved. There is no strain on her face, and she walks and sees better, thanks to Neways.

PS Mother has just been on the 'phone. "Have you mentioned my migraines? Well I have not had one for 5 months."

Dear Corinne,

Thank you for the information.

I have been taking the Maximol since Thursday and have had a considerable improvement since Saturday pm.

No pain, and return of articulation to all joints. Loss of nearly half a stone since Wednesday. It may be the combination of all 3 elements but until I stop the steroids next week I will not be able to assess the performance, but who cares anyway.

Whatever works is fine with me. Will keep you up to date.

Regards
Roger (Slade)

RHEUMATOID ARTHRITIS

My name is Jane Worsley, and I am a Clinical Biochemist and a Barrister. I am 36 years old and have suffered from Rheumatoid Arthritis for eight years. My illness has been so active and progressive that in 1991 I was forced to give up my job in the National Health Service where I have worked for thirteen years. I then studied law with a view to obtaining a sedentary job and was called to the Bar in February 1995. However, I am unfortunately still too unwell to pursue a career in this field.

I have been treated with conventional anti-inflammatory medicines over the years for my arthritis and they have partially controlled the disease as long as I was able to tolerate them. Unfortunately though, I can no longer take these since they cause me ulcers and other secondary problems. Over the years I have spent much money on various herbal and homeopathic remedies and whilst some of these have offered some relief of my pain and inflammation, I have always been disappointed with the results.

However, I have been taking REVENOL for eight months now and am sure that this has done more to help me than any other herbal or homeopathic remedy that I have tried. For the first time in years I have 'good periods' of anything from a few days to two weeks interspersed by a few 'bad days' which have been the normal for the past three years. My pain and inflammation are less, I have more mobility and I have much more energy, fatigue being a significant debilitating consequence of Rheumatoid Arthritis. I have no doubt that REVENOL has helped me more than any other non-conventional medicine that I have tried. I take 2 tablets 3 times a day, which is a large dose, and the effect is so significant that I notice more pain if I miss a dose. However, I feel that as the REVENOL has much work to do and that it helps me, I am prepared to take extra amounts of it. My hope is that my health will soon be predictable and improved enough to allow me to pursue normal working hours again. I have no doubt that REVENOL is helping my progress towards this end.

STIFFNESS / BACK PAIN

For the past 3 years, with an increasingly irritated lumbar area to contend with every morning, and despite trying to exercise the area and stretching the muscles as the years pass

away, I wondered when I would slip a disc, just sneezing. After the passing of my 50th birthday, I was having increasing trouble running a bath, getting in and out of it, putting on socks, shorts and trousers.

After witnessing what a difference MAXIMOL and REVENOL had made to a chap suffering from arthritis, I decided to order some for myself and can now report that after 4 weeks of the standard dose, I am completely free of pain and can even touch my toes without suffering.

Thank you Neways, for bringing relief to the masses.

RHEUMATOID ARTHIRITIS

BLOCKED VEINS

I'm a bit like Victor Meldrew: "I don't believe" the difference REVENOL, MAXIMOL SOLUTIONS, and ORACHEL have made to my life.

Two months ago I was discharged from hospital with the chilling diagnosis that the veins in my left leg were completely blocked. They couldn't do anything for me. I'd have to get used to painkillers. I'm 66 but felt I had it upside down – "99".

I was not thrilled with the term "product". I also didn't know any health food company that said they were anything but the best in the market.

Within 30 minutes of taking the "products"!!!! I felt as if my eyeballs had been polished.

Within three weeks my leg felt wonderful. So wonderful I ran 30 yards to see if I could sprint again. That was a mistake and it set my recovery back 10 days.

Other benefits:

- When I get up in the morning I'm not frozen up with **arthritis**.
- My back has been itchy for years. Not any more.
- My athletes foot is cured.
- No more headaches.
- All the age spots I've collected over the years are disappearing.
- My second big mistake was realising my neck didn't crack any more. I was so thrilled I shook my head from side to side. I paid for this later. My neck locked solid. It obviously didn't relish all this action after being stiff for years. Happily two days later it went right.
- The plumbing has been restored to full flow!

Otherwise the products are useless!!!

Thanks for your recommendation. I sent for the tapes to try to help others. I said I only wanted the distributorship for myself, but when you've tried and benefited so much you are compelled to pass it on.
